- High School
- The Council for the Indian School Certificate Examinations (CISCE)
- GRADE: 90.6%

LANGUAGES

- English (Fluent)
- Tamil (Fluent)
- Malayalam (Fluent)

PROFILE

Engineering student with a strong focus on data structures, algorithms, and object-oriented design, actively building a solid foundation for software engineering roles. Experienced in developing full-stack applications and committed to writing clean, maintainable code. Continuously expanding technical depth with long-term interest in scalable systems and cloud technologies.

PROJECTS

- CampusConnect - College Community Platform
 - Developed and deployed a campus networking platform using React and Firebase, enabling students to share updates and post academic queries in a structured feed.
 - Implemented secure authentication with Firebase Authentication and managed real-time content updates using Firestore, ensuring seamless user interaction.
- Smart City Complaint Management System
 - Built a MERN-stack platform for reporting and tracking civic issues.
 - Implemented secure REST APIs, role-based authentication, and a scalable MongoDB database.
 - Developed React dashboards for complaint management and status tracking.
- Personal Subscription Analytics Tracker
 - Built a MERN-based personal subscription tracker to manage recurring expenses and billing cycles.
 - Integrated Google Sign-In authentication, developed backend APIs, and implemented interactive monthly spending visualizations in React.
